● Important + Urgent

- Create Java class to organize poker hands
- Import poker hands as CSV files
- Compare player decisions with GTO recommendations

● Important + Not Urgent

- Analyze large WSOP datasets
- Create graphs and charts to visualize data
- Automate retrieving data from GTO sites

● Not Important + Urgent

- Use csv library to view poker hand data
- Use existing GTO tool for strategy calculations
- Use Java stats library for calculations

● Not Important + Not Urgent

- Build a complete GTO solver from scratch
- Support every poker variant
